

Abstract

The objectives of this research are to investigate the problems, obstacles, motivation, view points and questions of librarians concerning their need to produce academic works.

The population of this research were all the librarians (63) of Thammasat University Libraries. The questionnaires was used as tool for gathering data. The questionnaires was divided in 4 parts : 1) personal information 2) motivation to produce academic works 3) problems and obstacles 4) view points and suggestions.

The results of the research were ; most of the librarians produced academic works in order to use the works to meet the criterions for higher position classification; the librarians produced periodical articles mostly and the subject matter was about technical process; the problem most commonly encountered was that the librarian's main work took up all their time so they could not concentrate on the preparation of producing; the librarians need money support for all the process of producing academic works.
