LIST OF ABBREVIATIONS	xiv
CHAPTER	
I INTRODUCTION	1
II SPECIFIC OBJECTIVE	5
III LITERRATURES REVIEW	6
1. Cholera	6
1.1 Isolation and identification	6
1.1.1 Specimen collection	6
1.1.2 Biochemical identification	7
1.1.3 Serological identification	10
1.2 Epidemiology	11
1.2.1 Early pandemics	11
1.2.2 Seventh pandemic	12
1.2.3 Eighth pandemic	13
1.3 <i>V. cholerae</i> and its environment	14
1.4 Mechanisms involved in environmental survival of <i>V. cholerae</i>	15
1.5 Molecular characteristics of <i>V. cholerae</i>	17
1.6 The molecular aspects of <i>V. cholerae</i> infections	19
1.6.1 Colonization factors	19
1.6.2 Surface components	20
1.6.3 The cholera toxins	21
1.6.4 Additional virulence factors	23

CONTENTS (Cont.)

	Page
1.7 Transcriptional regulation of virulence factor expression	23
2. Pathogenesis	26
3. Immunology of cholera	28
3.1 Nonspecific factors	28
3.2 Gut mucosal immunity	28
4. Oral cholera vaccines	32
4.1 Whole cell-B subunit vaccine (WC-BS)	32
4.2 Live attenuated cholera vaccine	33
5. Adjuvants	34
5.1 Characteristics of an ideal adjuvant	34
5.2 Modes of action of adjuvants	35
5.3 Classification of adjuvants	41
5.3.1 Particulate adjuvants	41
5.3.2 Non-particulate adjuvants	52
IV MATERIALS AND METHODS	62
1. Preparation of antigens	62
1.1 Crude and purified <i>V. cholerae</i> TcpA	62
1.1.1 Bacterial strains	62
1.1.2 Protein expression and purification	62
1.2 Procholeragenoid	66
1.2.1 Bacterial culture	66
1.2.2 Harvest of bacterial culture and crude preparation	66
1.2.3 Purification of CT by using galactose column	67
1.3 Commercialized cholera toxin	70
1.4 <i>V. cholerae</i> lipopolysaccharide	70
1.4.1 Bacterial culture	70
1.4.2 Harvest of bacterial culture	70
1.4.3 Phenol-water extraction	70

CONTENTS (Cont.)

	Page
2. Protein determination	74
3. Sodium dodecyl sulfate-polyacrylamide gel electrophoresis	74
4. Staining	75
5. Preparation of antisera	76
5.1 Preparation of rabbit anti-cholera toxin serum	76
5.2 Preparation of rabbit anti-TcpA serum	76
5.2.1 Preparation of TcpA for rabbit immunization	76
5.2.2 Rabbit immunization	78
5.3 Anti- <i>V. cholerae</i> O1 LPS antibody	78
6. Preparation of liposome-associated vaccine plus CpG DNA	78
7. Experimental animals and oral immunization	79
8. Sample collection and antibody assessments	81
8.1 Isolation of mononuclear cells	82
8.2 Antigen-specific antibody-secreting (ASC) assay	82
8.3 An indirect ELISA	85
8.4 Vibriocidal antibody assay	87
V RESULTS	89
1. Results of antigen and immunogen preparation	89
1.1 Results of TcpA preparation	89
1.2 Results of cholera toxin preparation	92
1.3 Results of LPS preparation	95
2. Detection of antibody titers in the immune rabbit sera and mouse monoclonal antibody	99
3. Preparation of liposome-associated vaccine plus CpG DNA (ODN#1826)	99
4. Mucosal immune responses against oral cholera vaccine	102

CONTENTS (Cont.)

	Page
4.1 Antibody-secreting cells (ASC) in the blood circulation by ELISPOT assay	102
4.2 The serum antibody responses detected by indirect ELISA	108
4.3 Vibriocidal antibody response in sera	112
VI DISCUSSION	115
VII CONCLUSION	122
