

## LIST OF FIGURES

Figure	Page
<b>LITERRATURES REVIEW</b>	
1	The two <i>V. cholerae</i> chromosomes 18
2	The regulatory cascade that controls <i>ctx</i> and <i>tcp</i> transcription 25
3	Pathogen-derived immunomodulatory molecules activate Toll-like receptors (TLR) signaling pathways in innate cells 37
<b>RESULTS</b>	
4	Protein profiles of crude and purified TcpA 91
5	Protein profiles of crude and purified cholera toxin 94
6	Electrophoretic patterns of <i>V. cholerae</i> O17SR homogenate and LPS stained with Coomassie Brilliant Blue stain 97
7	Electrophoretic patterns of <i>V. cholerae</i> O17SR homogenate and LPS stained with Silver stain 98
8	A multilamellar of liposome by using 2% uranyl acetate under transmission electron microscopy 100
9	Numbers of antibody-secreting cells (ASC) in the blood circulation of primed-rats and controls 104
10	Specific CT ASC in the blood circulation of primed-rats at days 2, 3, 4, 5, 6, 13, and 21 after the booster immunization and controls 105
11	Specific LPS ASC in the blood circulation of primed-rats at days 2, 3, 4, 5, 6, 13, and 21 after the booster immunization and controls 106
12	Specific TcpA ASC in the blood circulation of primed-rats at days 2, 3, 4, 5, 6, 13, and 21 after the booster immunization and controls 107
13	Reciprocal indirect ELISA antibody titers to CT in plasma of primed-rats and controls 109
14	Reciprocal indirect ELISA antibody titers to LPS in plasma of primed-rats and controls 110

**LIST OF FIGURES (Cont.)**

<b>Figure</b>		<b>Page</b>
<b>RESULTS</b>		
15	Reciprocal indirect ELISA antibody titers to TcpA in plasma of primed-rats and controls	111
16	Example of a vibriocidal antibody assay	113
17	Reciprocal vibriocidal antibody titers in plasma of primed-rats compared to those of the controls	114
