LIST OF TABLES	xiv
LIST OF FIGURES	xvii
LIST OF ABBREVIATIONS AND SYMBOLS	xxvii
CHAPTER	
I INTRODUCTION	1
II OBJECTIVES	5
III LITERATURE REVIEW	6
1. Leptospirosis	6
1.1 Epidemiology	7
1.2 Pathophysiology and clinical management	10
1.3 Clinical and laboratory diagnosis	12
1.4 Serologic and molecular typing	15
1.5 Genome and microbiology	16
1.6 Pathogenesis	17
1.6.1 Host factors	18
1.6.2 Virulence	19
1.7 Vaccines and immunity	21
2. Proteomic technology	22
2.1 Application of proteomics	24
2.2 Separation of the protein mixture	24
2.3 Detection	25
2.4 Image analysis	25
2.5 Identification of proteins	25
2.5.1 Peptide mass fingerprinting	25
2.5.2 Amino acid sequence analysis	26

CONTENTS (Cont.)

	Page
2.6 Characterization of proteins	26
2.7 Functional proteomics	26
2.8 Expression proteomics: Two-dimensional electrophoresis technology for proteomics	27
IV MATERIALS AND METHODS	29
1. <i>Leptospira</i> spp. cultivation	29
2. Two dimensional difference gel electrophoresis (2D-DIGE) of <i>Leptospira</i> spp.	29
2.1 Preparation of <i>Leptospira</i> whole cells homogenate for 2D- DIGE	29
2.2 Preparation of CyDye™ DIGE Fluor minimal dyes for protein labelling	31
2.3 Preparation of™ DIGE Fluor minimal dye for labeling proteins of <i>Leptospira</i> spp. lysate	31
2.4 <i>Leptospira</i> protein labelling	32
2.4.1 Preparation of an internal standard	32
2.4.2 Protein labeling with the CyDye™ DIGE Fluor minimal dyes	32
2.4.3 Preparation of labeled protein samples for the first dimension separation	32
2.5 Focusing using the Ettan IPGphor isoelectric focusing system	32
2.5.1 Rehydrating IPG strips containing of protein samples	34
2.5.2 Isoelectric focusing parameters	34
2.6 Second dimension SDS-PAGE	34
2.7 DeCyder Differential Analysis Software co-detection and matching using the internal standard	35
2.7.1 Intra-gel co-detection	35
2.7.2 Inter-gel matching	36

CONTENTS (Cont.)

	Page
2.7.3 Image analysis	36
2.7.4 Colloidal Coomassie Brilliant Blue protein stain for spot picking	39
2.7.5 Spot picking, excision and Spot Handling Work Station	40
2.7.6 MALDI-ToF and Mass spectrometry (MS) analysis	40
2.7.7 LC/MS/MS	41
2.7.8 Database search	42
3. Antibodies and Serum Samples for the study of unique proteins of pathogenic <i>Leptospira</i> spp./ <i>Leptospira</i> immunome/in vivo expressed antigens of <i>Leptospira</i> spp.	42
3.1 Antigens preparation for monoclonal antibody production	42
3.1.1 <i>Leptospira</i> spp. and their whole cell homogenates	42
3.1.2 Heterologous microorganisms	42
3.2 Murine hybridomas and Murine monoclonal antibodies	43
3.2.1 Immunization of the BALB/c mice	43
3.2.2 Preparation of myeloma cells	44
3.2.3 Preparation of the immune spleen cells	44
3.2.4 Preparation of the feeder cells	45
3.2.5 Cell fusion	45
3.2.6 Nurturing of the newly growing hybrids	46
3.2.7 Cloning of the hybridomas	46
3.2.8 Cell Freezing for cryopreservation	47
3.2.9 Cell thawing from the cryovials	48
3.3 Characterization of monoclonal antibodies	48
3.3.1 An indirect ELISA	48
3.3.2 Sodium dodecyl sulfate-polyacrylamide gel electrophoresis (SDS-PAGE)	49
3.3.3 Preparation of samples for loading into the slab gel	50

CONTENTS (Cont.)

	Page
3.3.4 Running the gel	50
3.3.5 Staining and destaining of protein bands	50
3.3.6 Silver staining	51
3.3.7 Western blot analysis	51
3.3.8 Isotyping of the monoclonal antibodies	52
3.4 Mouse immune serum	52
3.5 Acute phase sera and convalescence phase sera of leptospirosis patients	52
3.6 Sera of other febrile illnesses	54
3.7 Normal sera of leptospirosis endemic area	54
4. Two-dimensional gel electrophoresis (2DE)	54
4.1 Preparation of <i>Leptospira</i> whole cell homogenates for 2DE	54
4.2 Rehydrating IPG strips in the presence of protein samples	55
4.3 Isoelectric focusing parameters for 7 cm IPG strip	55
4.4 Second dimension SDS-PAGE	56
4.5 2DE-immunoblotting	56
4.6 Liquid chromatography/mass spectrometry (LC/MS)	58
5. Construction of DNA sequences for DNA prototype vaccine (s)	59
5.1 Selection of <i>Leptospira</i> gene candidates	59
5.2 Preparation of <i>Leptospira</i> genomic DNA for DNA templates	59
5.3 Primers design for amplification of DNA vaccine candidate genes from <i>Leptospira</i> spp.	60
5.4 Amplification of DNA gene segments	60
5.5 Cloning of DNA segments into pGEM-T Easy vector	60
5.5.1 Purification of DNA amplicons	60
5.5.2 Ligation of DNA amplicon into pGEM-T Easy vector	61
5.5.3 Transformation of recombinant plasmid into competent <i>E. coli</i>	61

CONTENTS (Cont.)

	Page
5.5.3.1 Preparation of competent cells	61
5.5.3.2 DNA transformation	61
5.5.3.3 Screening for positive clones	62
5.6 Cloning of <i>Leptospira</i> vaccine candidate genes into pcDNA 3.1(+) vector	62
5.6.1 Examination of the positive <i>E. coli</i> clones	64
5.6.2 Preparation of recombinant expression vector	64
5.6.3 Preparation of recombinant pc DNA 3.1(+) plasmid	65
5.6.3.1 Preparation of <i>E. coli</i> with recombinant plasmids	65
5.6.3.2 Extraction of pcDNA plasmid	65
5.7 Study of the immunogenicity and protective efficacy of the DNA vaccine against <i>Leptospira</i> infection	66
V RESULTS	68
1. <i>Leptospira</i> spp. cultivation	68
2. Two dimensional difference gel electrophoresis (2D-DIGE) of <i>Leptospira</i> spp.	68
2.1 Results of MALDI-TOF and Mass spectrometry (MS) analysis	104
2.2 Results of LC/MS/MS analysis	111
3. The study of unique proteins of pathogenic <i>Leptospira</i> spp., <i>Leptospira</i> immunomes and <i>in vivo</i> expressed antigens of <i>Leptospira</i> spp.	117
3.1 Results of preparation of leptospiral antigens	117
3.2 SDS-PAGE analysis of <i>Leptospira</i> antigens	117
3.3 Results of the mouse immunization	117
3.4 Hybridomas and specificity of monoclonal antibodies	119

CONTENTS (Cont.)

	Page
3.5 Condition trying for 2DE separated-whole cell homogenates of <i>Leptospira borgpetersenii</i> serogroup Tarassovi serovar Tarassovi	121
3.6 <i>Leptospira</i> proteins containing epitopes of MAbLPF1, MAbLPF2 and mouse immune serum	127
3.7 Results of <i>Leptospira</i> proteins containing epitopes of <i>in vivo</i> expressed of leptospirosis patients	143
4. Broad spectrum leptospirosis vaccine	176
4.1 Construction of a prototype <i>Leptospira ompL1</i> DNA vaccine	176
4.2 Large scale preparation of recombinant pcDNA3.1 (+) carrying <i>Leptospira ompL1</i> DNA	177
4.3 Study of the immunogenicity and protective efficacy of the DNA vaccine against <i>Leptospira</i> infection	177
4.3.1 An Indirect ELISA	178
4.3.2 Challenging	178
