ACKNOWLEDGEMENTS	i
ABSTRACT	iii
CONTENTS	vii
LIST OF TABLES	xiii
LIST OF FIGURES	xvii
LIST OF ABBREVIATIONS	xxii
CHAPTER	
I INTRODUCTION	1
II OBJECTIVES	7
III LITERATURE REVIEW	8
1. Malaria	8
2. Antimalarials	10
2.1. Mefloquine (MQ)	10
2.2. Artemisinin (ARN)	12
2.3 Artesunate (ARS)	15
2.4 Dihydroartemisinin (DHA)	33
3. Drug resistance	35
4. Artemisinin-based combination therapy	39
5. Conclusion	40
IV CLINICAL EFFICACY OF MONOTHERAPY OF HIGH DOSE DIHYDROARTEMISININ OR COMBINATION THERAPY OF HIGH DOSE DIHYDROARTEMISININ AND MEFLOQUINE IN VIETNAMESE PATIENTS WITH UNCOMPLICATED FALCIPARUM MALARIA	41
1. Introduction	41
2. Patients and methods	42

CONTENTS (cont.)

	Page
2.1 Patients	42
2.2 Treatment administration	43
2.3 Clinical assessments	44
2.4 Laboratory assessments	44
2.5 Parasitological assessments	45
2.6 Patients' follow-up	45
2.7 Evaluation of treatment outcomes	45
2.8 Adverse effects	46
2.9 Data management and analysis	46
3. Results	47
3.1 Patient characteristics	47
3.2 Clinical responses	48
3.3 Parasitological responses	48
4. Discussion	49
5. Conclusion	52
V PHARMACOKINETICS OF MEFLOQUINE WITH DIHYDROARTEMISININ AS 2-DAY REGIMENS IN PATIENTS WITH UNCOMPLICATED FALCIPARUM MALARIA	57
1. Introduction	57
2. Patients and methods	58
2.1 Patients	58
2.2 Treatment regimens	58
2.3 Clinical assessments	59
2.4 Blood sample collection	60
2.5 Determination of MQ concentrations	60
2.6 Pharmacokinetic analysis	60

CONTENTS (cont.)

	Page
2.7 Statistical analysis	61
3. Results	61
3.1 Clinical and laboratory results	61
3.2 MQ pharmacokinetics	64
4. Discussion	66
5. Conclusion	67
VI DEVELOPMENT AND VALIDATION OF A LIQUID CHROMATOGRAPHY – MASS SPECTROMETRY METHOD FOR THE SIMULTANEOUS QUANTIFICATION OF ARTESUNATE AND DIHYDROARTEMISININ IN HUMAN PLASMA	68
1. Introduction	68
2. Experiment	69
2.1 Chemicals	69
2.2 Instrumentation	70
2.3 Calibration curve	70
2.4 Sample preparation	70
2.5 Validation	71
2.5.1 Limit of detection (LOD) and limit of quantification (LOQ)	71
2.5.2 Precision and accuracy	71
2.5.3 Recovery	72
2.5.4 Stability	72
2.6 Clinical application	72
3. Results	73
3.1 Mass spectra analysis	73
3.2 Chromatography analysis	73

CONTENTS (cont.)

	Page
3.3 LOD and LOQ	73
3.4 Calibration and linearity	74
3.5 Precision and accuracy	74
3.6 Recovery	74
3.7 Stability of ARS	75
3.7.1 Stability of ARS at 4°C	75
3.7.2 Stability of ARS at room temperature	75
3.8 Clinical application	75
4. Discussion	76
5. Conclusion	80
VII PHARMACOKINETICS OF A FIVE-DAY ORAL DIHYDROARTEMISININ MONOTHERAPY REGIMEN IN PATIENTS WITH UNCOMPLICATED FALCIPARUM MALARIA	90
1. Introduction	90
2. Patients and methods	92
2.1 Patients	92
2.2 Clinical assessments	92
2.3 Drug administration	93
2.4 Blood sampling	93
2.5 Drug assay	93
2.6 Pharmacokinetic analysis	95
2.7 Statistical analysis	95
3. Results	98
3.1 Clinical and laboratory findings	98
3.2 Treatment response	98
3.3 Pharmacokinetic analysis	102
4. Discussion	107

CONTENTS (cont.)

	Page
5. Conclusion	110
VIII ABSENCE OF TIME DEPENDENCY IN ARTESUNATE PHARMACOKINETICS IN HEALTHY SUBJECTS FOLLOWING A FIVE-DAY ORAL ADMINISTRATION	111
1. Introduction	111
2. Materials and Methods	112
2.1 Subjects	112
2.2 Study procedures	112
2.3 Drug assay	112
2.4 Pharmacokinetic analysis	114
2.5 Statistical analysis	115
3. Results	115
3.1 Baseline characteristics	115
3.2 DHA pharmacokinetics	116
3.3 ARS pharmacokinetics	119
4. Discussion	121
5. Conclusion	124
