CHAPTER	
I INTRODUCTION	1
II OBJECTIVES	3
III LITERATURES REVIEW	4
1. Malaria	4
1.1 Life cycle of Malaria	4
1.2 Clinical symptoms of malaria	8
1.3 Periodic of fever in malaria	8
1.4 Tumor necrosis factor (TNF) in the pathogenesis of malaria fever	11
2. Effect of febrile temperature of <i>P. falciparum</i> parasites	13
2.1 Effect of febrile temperature on survival of <i>P. falciparum</i> parasites	13
2.2 Effect of febrile temperature on the expression profile of <i>P. falciparum</i>	16
2.3 Effect of febrile temperature on biological characteristics and their regulated genes	20
2.3.1 Trafficking genes	20
2.3.2 Secreted and cell surface molecules	21
2.3.3 Cytoplasmic systems and signal transduction	23
2.3.4 RNA metabolism	26
2.3.5 Nuclear functions	26

CONTENTS (Cont.)

	Page
2.3.6 General metabolism	27
2.4 Effect of febrile temperature on <i>P. falciparum</i> pathology	31
2.5 Effect of febrile temperature on drug transporter	32
2.6 Effect of febrile temperature on <i>P. falciparum</i> heat shock protein	33
3. Heat shock proteins in <i>P. falciparum</i>	42
3.1 <i>Plasmodium falciparum</i> Hsp70 (PfHsp 70)	42
3.2 Effect of heat on PfHsp70	43
3.3 Structure of PfHsp70	43
3.4 Heat shock protein DnaJ homologues from <i>P. falciparum</i> (Pfj 1)	44
3.5 Immunology of PfHsp70	44
IV MATERIALS AND METHODS	
1. Culture system for parasite maintenance	46
1.1 Culture medium	46
1.2 Preparation of uninfected erythrocytes	47
1.3 Serum	47
1.4 Gas phase	47
1.5 Parasite cultivation	48
1.6 Monitoring of culture parasitaemia	49
1.7 Synchronisation of parasite culture	49
1.8 Cryopreservation and retrieval of parasite culture	49
2. <i>In vitro</i> drug sensitivity assay	50
2.1 Preparation of drug solutions	50
2.2 Preparation of parasite inoculum	51
2.3 Preparation of [³ H] hypoxanthine	51
2.4 <i>In vitro</i> sensitivity assay	51
2.5 Harvesting of microtitre plate	52

CONTENTS (Cont.)

	Page
2.6 Scintillation counting	52
2.7 Data analysis	52
3. Effect of temperature on malarial growth and development	53
3.1 Rate of reinfection	55
4. Effect of temperature and drug stress on malarial development	55
4.1 Effect of temperature on malarial drug susceptibility after 1 cycle	57
4.2 Effect of temperature on malarial drug susceptibility at phase A	57
5. Effect of temperature and drug stress on heat shock protein 70	57
5.1 Protein extraction	57
5.2 SDS Polyacrylamide gel electrophoresis (SDS PAGE)	57
5.3 Gel staining	58
5.3.1 Colloidal stain	58
5.4 Western blotting	58
5.5 Immune Blotting	58
5.6 Protein identification by Mass spectrometry	59
6. Data analysis	59
 V RESULTS	
1. Effect of temperature on malarial growth and development	60
1.1 Effect of temperature on malarial growth and development on <i>P. falciparum</i> standard strains	62
1.2 Effect of temperature on malarial growth and development on <i>P. falciparum</i> field isolates	68
2. <i>In vitro</i> drug sensitivity assay	78
3. Effect of temperature and drug stress on malarial drug development	81
3.1 Effect of temperature with chloroquine (CQ) on malarial drug development	81
3.2 Effect of temperature with chloroquine (CQ) on 3D7 strain development	85

CONTENTS (Cont.)

	Page
3.3 Effect of temperature with chloroquine (CQ) on fives isolates strain development.	89
3.4 Effect of temperature with Artesunate (ARS) on K1 strain development	95
3.5 Effect of temperature with Artesunate (ARS) on 3D7 strain development	99
3.6 Effect of temperature with Artesunate (ARS) on five isolates strain development	103
4. Effect of temperature and drug stress on <i>P. falciparum</i> heat shock protein 70 (<i>PfHSP70s</i>)	109
4.1 Protein expression pattern assayed by SDS PAGE	109
4.2 Detection of <i>P. falciparum</i> heat shock protein 70 (<i>pfHSP70s</i>) by Immun Blotting	111
4.3 Protein identification by Mass spectrometry	118
VI DISCUSSION	
1. Effect of temperature on malarial growth and development	123
1.1 Effect of temperature on malarial growth and development on <i>P. falciparum</i> standard strains	123
1.2 Effect of temperature on malarial growth and development on <i>P. falciparum</i> filed isolates	124
2. <i>In vitro</i> drug sensitivity assay	124
3. Effect of temperature and drug stress on malarial drug development	126
3.1 Effect of temperature with chloroquine (CQ) on K1 strain development	126
3.2 Effect of temperature with chloroquine (CQ) on 3D7 strain development	127
3.3 Effect of temperature with chloroquine (CQ) on fives isolates development	127

CONTENTS (Cont.)

	Page
4. Effect of temperature and drug stress on <i>P. falciparum</i> heat shock protein 70 (<i>pfHSP70s</i>)	128
VII CONCLUSION	
1. Effect of temperature on malarial growth and development	130
2. <i>In vitro</i> drug sensitivity assay	130
3. Effect of temperature and drug stress on malarial drug development	130
4. Effect of temperature and drug stress on <i>P. falciparum</i> heat shock protein 70 (<i>pfHSP70s</i>)	131
