

ACKNOWLEDGEMENTS

I would like to express my sincere appreciation to my thesis advisor, Professor Dr. Kesara Na-Bangchang and my thesis co-advisor, Professor Dr. Carol Hopkins Sibley, Department of Genome Sciences, University of Washington and Associate Professor Dr. Mathirut Mungthin, Department of Parasitology, Phramongkutkloao College of Medicine for their valuable advice, guidance, understanding, criticisms and encouragement.

My appreciations to:

Professor Sodsri Thaithong, Department of Biology, Chulalongkorn University for her valuable advice, encouragement and thoughtful comments on my thesis.

Dr. Kanungnit Congpuong, Bureau of Vector Borne Disease, Department of Disease Control, Ministry of Public Health for her thoughtful comments on my thesis.

Dr. David Jacobus of Jacobus Pharmaceutical, Inc. for the gift of the drugs used in the study, and for his thoughtful comments on the manuscript.

My friends from Sibley laboratory, Department of Genome Sciences, University of Washington, for their warm welcome and kind assistance.

The entire staff of the Graduate Program in Biomedical Sciences, Faculty of Allied Health Sciences, Thammasat University, for their kind assistance during my study.

For the successful of this work, I would like to thanks the patients who participated in this study, the staff of the Mae Sot General Hospital and the staff of Malaria Clinics for their co-operation and kind assistance during sample collection.

Lastly, I would like express my special thanks to The Royal Golden Jubilee Ph.D. Programme of the Thailand Research Fund for supporting this work.
