

## LIST OF FIGURES

Figure	Page
<b>LITERATURES REVIEW</b>	
1. The global distribution of malaria parasite	8
2. Annual reported malaria incidence in Thailand from 1998-2005	13
3. Hypothetical phylogenetic trees for the origin of <i>P. vivax</i>	16
4. The life cycle of <i>P. vivax</i>	18
5. Overview of the folate biosynthesis pathway	22
6. Chemical structure of DHPS inhibitors	24
7. Chemical structure of DHFR inhibitors	26
8. Schematic structure of <i>P. vivax</i> DHFR-TS gene and amino acid alignment for <i>P. vivax</i> DHFR and <i>P. falciparum</i> DHFR	31
9. Schematic structure of <i>P. vivax</i> <i>pppk-dhps</i> gene and amino acid sequence alignment of DHPS for <i>P. vivax</i> , <i>P. falciparum</i> and <i>E. coli</i>	34
10. The distribution of mutations in <i>Pvdhfr</i> from difference geographic regions	38
<b>MATERIALS AND METHODS</b>	
11. Collection of blood samples from <i>P. vivax</i> infected patients for <i>in vitro</i> drug sensitivity assay	51
12. Procedure for assessment of short term <i>in vitro</i> drug sensitivity for <i>P. vivax</i>	54
13. The shuttle plasmid GR7	57
14. Overview of the PCR amplification and exogenous <i>Pvdhfr</i> expression process	58
15. Diagram of a typical 96 well culture dish arrangement for the IC <sub>50</sub> determination	60

## LIST OF FIGURES (Cont.)

Figures	Page
<b>RESULTS</b>	
16. Box plot of the $\log_{10}$ of the $IC_{50}$ values measured in the short term <i>in vitro</i> culture system in <i>P. vivax</i> field isolates from Mae Sot, Thailand.	64
17. Sensitivity of yeast to antifolate drugs dependent on various <i>Pvdhfr</i> alleles to pyrimethamine, chlorcycloguanil and WR99210	74
18. The sequences of <i>Pvdhfr</i> obtained in comparison with the wild-type sequence at indicated residues	77
19. Map of different originating <i>P. vivax</i> samples derived from Thailand.	79
20. The sequences of <i>Pvdhps</i> obtained in comparison with the wild-type sequence at indicated residues	81
21. Map of different originating <i>P. vivax</i> samples derived from Thailand.	83
22. Relationship between <i>in vitro</i> sensitivity based on yeast expression system (expressed as $IC_{50}$ values) and patterns of <i>Pvdhfr</i> allelic variants	87
