

## ACKNOWLEDGEMENTS

This work would not have been possible without the help from a number of colleagues, who should be acknowledged here. My foremost thanks go to Dr. Nipon Poapongsakorn, chairman of my thesis committee, for his invaluable guidance, comments and helpful suggestions. I am grateful for his time, effort and contribution to the review and editing process. I especially appreciate Dr.Suthad Setboonsrang whom I am extremely impressed for his constructive comments and sound advice which lead me to the completion of this thesis.

I am indebted to Ms. Suvanee Vatthanachit in warning me not to loose my self-confidence which is very important to cope with any obstruction. Sincere thanks also go to Mr.Somboon Siriprachai, a member of thesis committee, for his comments and suggestions. I am also indebted to all interviewees for their kind coöperation. Without them, this thesis cannot be completed. Needless to say, none of these people are responsible for any deficiencies that may remain.

I assert my gratitude to Sanwa Bank Foundation for providing me the two-year scholarship to study in this M.A. program.

I would like to extend my thanks to all my survey partners for their warm friendship. Sincere thanks also go to my beloved friends for sharing happiness and sadness with me. Special thanks are due to Sinhua for his countless help, to Niramon for her computer-time devotion and to my younger sister for her confidence in me.

Finally, I wish to express my deepest and sincere  
gratefulness to my parents whom I owe everything.
