

ACKNOWLEDGEMENTS

I wish to express my sincerest gratitude to Dr. Sirilaksana Chutikul, the chairperson of my thesis committee; Dr. Sukanya Nitungkorn and Dr. Atchana Wattananukit, members of my thesis committees, for their guidances and constructive comments.

Special thanks go to the officials from Metallurgical-Work Control Section, Metallurgy Division, Department of Mineral Resources and the officials from Computer-Work, Department of Customs, who provided very helpful data especially in zinc end-uses.

Financial support for my two-year study in Master of Economics Program coming from the IMAI Memorial Charitable Trust for Oversea Co-operation, is hereby highly appreciated.

Needless to say, I alone am responsible for any remaining errors in this study.
