

## ACKNOWLEDGEMENT

To accomplish this research, a lot of people gave me valuable suggestions, solutions, comments and moral support.

First of all, I would like to express my gratitude to Asst. Prof. Vimolchaya Yanasugondha, my research advisor, for the comments and help with a determination to revise the topic and content with patience. My heartfelt thanks also go to my instructors at Thammasat University, both foreigners and Thai, who brought this topic to my mind and who also gave me the rewarding experiences of being an English teacher.

Apart from this, I would like to express my appreciation to all of my friends in TEFL 6 for their help and moral support, and also the staff at the Language Institute Thammasat University. Those people help me pass through the hardest time of my life.

I have to mention the kind teachers and lovely students at Prathomsuksa Thammasat school for the pilot study, Saint Joseph Bangna School, Sacred Heart Convent School and my senior colleagues at The Satit Bilingual School for their contribution. I would like to forward my sincere thanks to my old friends for their computer and SPSS. Without these people's hands, this research would not have been successful.
