

ACKNOWLEDGEMENTS

Upon completion of this research study, I would like to sincerely express my gratitude to these people whose without cooperation the researcher would never have made it today.

Firstly, m ay m y k ind est R esearch A dvisor, A jarn W anna C haroenchang, a ccept my grateful appreciation for her guidance, patience, understanding, and encouragement throughout the consulting period.

Another deepest gratitude goes to my boss, Mrs. Vipaporn Sritulakarl who was very understanding during this critical period in which work and study clashed. Together with this, I would like to express hundreds of thanks to the participants for their cooperation in completing and returning the questionnaires in time.

My appreciation, finally, is for my dear MEC friends whose inspiration and encouragement have contributed to the completion of this paper. Thank you very much.
