

LIST OF TABLES

TABLE	PAGE
REVIEW OF LITERATURE	
1	Essential amino acid content in Ma-kiang fruits.....6
2	Non-essential amino acid content in Ma-kiang fruits6
3	Antioxidant compounds containing in foods.....17
METHODOLOGY	
4	Thin layer chromatography (TLC) confirmation of phytochemical.....28
FINDING AND RESULTS	
5	Ethanol soluble extractive value, water soluble extractive value, total ash.....58 and acid insoluble ash of plant powder of <i>C. nervosum</i> var. <i>paniala</i>
6	Preliminary phytochemical screening of <i>C. nervosum</i> var. <i>paniala</i>59
7	Thin layer chromatography (TLC fingerprints) of <i>C. nervosum</i> var.....61 <i>paniala</i>
8	The percentage yield of crude extracts of <i>C. nervosum</i> var. <i>paniala</i>71 from different extraction methods
9	Total monomeric anthocyanin content in crude extracts of <i>C</i>76 <i>nervosum</i> var. <i>paniala</i> from different extraction methods
10	Pigment degradation, polymeric color and browning content in.....78 crude extracts of <i>C. nervosum</i> var. <i>paniala</i> from different extraction methods
11	Total phenolic compounds content in crude extracts of <i>C. nervosum</i>79 var. <i>paniala</i> from different extraction methods
12	Ascorbic acid, catechin, cyanidin 3-glucoside, gallic acid, kaempferol.....83 and quercetin content in crude extracts of <i>C. nervosum</i> var. <i>paniala</i> from different extraction methods
13	Antioxidant activity (reduction of DPPH radical assay) of the.....92 reference standards and crude extracts of <i>C. nervosum</i> var. <i>paniala</i> from different extraction methods

LIST OF TABLES (continued)

TABLE	PAGE
14 Antioxidant activity (inhibition of lipid peroxidation on liposome assay).....95 of the crude extracts of <i>C. nervosum</i> var. <i>paniala</i> from different extraction methods	95
15 <i>In vitro</i> cytotoxicity assay of the crude extracts of <i>C. nervosum</i> var.....97 <i>paniala</i> from different extraction methods	97
16 <i>In vitro</i> cytotoxicity assay of the purified compound from <i>C. nervosum</i>98 var. <i>paniala</i> , ascorbic acid, catechin, gallic acid, kaempferol and quercetin	98
17 Nutritive value of the crude extracts of <i>C. nervosum</i> var. <i>paniala</i> from.....100 E95FD and WFD methods	100
18 The fraction of purified compounds by column chromatography with.....102 bioassay-guide fractionation of E95FD extract of <i>C. nervosum</i> var. <i>paniala</i>	102
19 Stability of 95% ethanol-freeze dry (E95FD) extract in accelerate.....112 condition	112
20 Stability of water-freeze dry (WFD) extract in accelerate condition.....113	113
21 Stability of 95% ethanol-freeze dry (E95FD) extract in ambient.....119 temperature condition	119
22 Stability of water-freeze dry (WFD) extract in ambient temperature.....120 condition	120
