Abstract	iii
List of Figures	ix
List of Tables	xi
Glossary of Symbols	xii
Chapter	
1 Introduction	1
1.1 History	1
1.2 The Development of Mobile Phone System	1
1.2.1 The First Generation Mobile Phone System (1G)	1
1.2.2 The Second Generation Mobile Phone System (2G)	2
1.2.3 The Third Generation Mobile Phone System (3G)	4
1.3 Standard and Specifications of WCDMA system	5
1.4 Overview of Data Transmission and Reception in WCDMA System .	6
1.5 Motivations and Goals of this thesis	7
2 Base Station Receiver Design	9
2.1 Overview	9
2.2 Mobile Station Transmitter	9
2.3 The Multipath Channel Model	11
2.3.1 Tapped Delay Line Channel Model	11
2.4 Base Station Receiver	12

2.5	Multipath Searcher	13
2.5.1	Correlation	13
2.5.2	Noncoherent Averaging	14
2.5.3	Threshold Computation	15
2.5.3.1	A fraction of the power of the strongest path	15
2.5.3.2	NTT method	15
2.5.3.3	Base the selection threshold on the statistical of the noise-only path	15
2.5.3.4	Base on statistical properties of the involved random processes	16
2.5.4	Peak Searching	16
2.6	Rake Receiver and Channel Estimator	16
2.6.1	Channel Estimation based on Weighted Multi-Slot Averaging Technique	17
2.7	Simulation Results	20
2.7.1	Single User Detection	21
2.7.1.1	Floating point performances	21
2.7.1.2	Fixed point performances	23
2.7.2	Multiuser Detection	24
3	Design of SIR Estimator	33
3.1	Introduction	33
3.1.1	Conventional SIR Estimator	33
3.1.2	Adjustable SIR Estimator	36
3.2	Improving Performance with a Post-processing stage	38
3.2.1	Moving Average (MA) Filter	39
3.2.2	Exponential Moving Average (EMA) Filter	40
3.2.3	IIR Filters	41
3.2.4	Least-Mean-Squared (LMS) Adaptive Filter	43
3.3	Performance Comparison of SIR Estimators	48

4	Hardware Implementation	57
4.1	Background of Downlink Rake Receiver	57
4.2	The Design of Multipath Searcher and Rake receiver circuits on FPGA board	57
4.3	Resources usage	61
5	Conclusions	63
5.1	Summary of Contribution for Base Station Receiver	63
5.1.1	Summary of Multipath Searcher Algorithm	63
5.1.2	Summary of Rake Receiver and Channel estimator Algorithms	64
5.1.3	Summary of The Hardware Performances	64
5.2	Summary of Contribution for SIR Estimators	65
5.2.1	Conclusion of SIR Estimators	65
5.3	Topics for Suggested Future Works	66
	References	68
	Appendix	73
A	Uplink Spreading and Scrambling	73
A.1	Overview	73
A.2	Spreading	73
A.3	Auto and Cross-correlation Properties of OVSF Codes	74
A.3.1	Scrambling codes	74
A.3.1.1	General	74
A.3.1.2	Long scrambling sequence	75
B	Uplink Physical Channel	77
B.1	Dedicated uplink physical channels	77
C	Uplink Transmitter by Using Matlab v6.5	79
D	Multipath Searcher by Using Matlab v6.5	83

E	Rake Receiver by Using Matlab v6.5	87
F	The Design of Base Station Receiver by Using VHDL Code	91
G	The Design of Multipath Searcher by Using VHDL Code	95
H	The Design of Rake Receiver by Using VHDL Code	125
I	Maximum Ratio Combining Used in Rake Receiver by Using VHDL Code	129
J	Rake Finger Used in Rake Receiver by Using VHDL Code	137
