

List of Tables

Tables		Page
4.1	Chemical composition and physical properties of cement and fly ashes	20
4.2	Mix proportion of concrete in natural environment	21
4.3	Mix proportion of mortar in natural environment	22
4.4	Environmental conditions (annual average)	24
4.5	Mix proportion of mortar in accelerated environments	26
4.6	Mix proportion of mixtures for relative water content test	28
5.1	Test results of 28-day compressive strength (cylinder), carbonation depth and carbonation coefficient (in natural environments) of concrete	29
5.2	Test results of carbonation depth and carbonation coefficient (city-sheltered environment) of mortars	31
5.3	Carbonation depths of concretes (accelerated environment)	44
5.4	Slope for different environments	46
5.5	Carbonation depths of mortars (accelerated environments)	49
5.6	Carbonation depths of mortars in various conditions (accelerated environments)	51
5.7	Test results of compressive strength of mortars (cube)	52
5.8	Relative water content distribution in mortar	55
5.9	Relative water content distribution in pastes	57
