

## LIST OF TABLES

Table Title	Page
3.1 Strategic management in each supply chain system	25
4.1 Input data for the numerical example of a single dyadic supply chain	53
4.2 Computational results of the decentralized and centralized controlling policy in a single dyadic supply chain (6 periods' planning horizon)	59
4.3 Computational results of the coordinating controlling policy with one-sided incentive in a single dyadic supply chain (6 periods' planning horizon)	61
4.4 Computational results of the coordinating controlling policy with two-sided incentive in a single dyadic supply chain (6 periods' planning horizon)	63
4.5 Comparison of the performances of the chain and all members under bonus variations of a single dyadic supply chain	66
5.1 Input data for the numerical example of a single manufacturer and multi-retailers' supply chain	78
5.2 Different characteristics among the retailers in the numerical example	78
5.3 Comparison of the performances among different perspectives (6 periods' planning horizon)	83
5.4 Comparison of the decision variables among different perspectives (6 periods' planning horizon)	84
5.5 Comparison of the cost parameters among different perspectives (6 periods' planning horizon)	85
5.6 Comparison of the performances of the chain and all members under bonus variations of a single manufacturer and multi-retailers' supply chain	87
6.1 Input data for the numerical example of a single retailer and multi-manufacturers' supply chain	102
6.2 Different characteristics among the manufacturers in the numerical example	103
6.3 Comparison of the performances among different perspectives in a single retailer and multi-manufacturers' supply chain (6 periods' planning horizon)	107
6.4 Comparison of the decision variables among different perspectives in a single retailer and multi-manufacturers' supply chain (6 periods' planning horizon)	107
6.5 Comparison of the cost parameters among different perspectives in a single retailer and multi-manufacturers' supply chain (6 periods' planning horizon)	108
6.6 Comparison of the performances of the chain and all members under bonus variation of a single retailer and multi-manufacturers' supply chain	109
A.1 Discrete Lot Sizing ( <i>DLS</i> ) under 6 periods' planning horizon	A-2
