

LIST OF TABLES

TABLE	PAGE
6.1 The mix design taking into account the effect of the low unit CaO content	39
6.2 The mix design taking into account the effect of curing temperature	40
B.1 Details of the mix proportions of Tangtermsirikul and Nipat (1999)	B-2
B.2 Details of the mix proportions of Tangtermsirikul and Nipat (1998)	B-3
B.3 Details of the mix proportions of Sujjavanich (1998)	B-4
B.4 Details of the mix proportions of Tahir (1998)	B-5
B.5 Details of the mix proportions of Deatpan (1999)	B-6
B.6 Details of the mix proportions of RCC of Sribua-laum (1996)	B-7
B.7 Details of the mix proportions of SCC of Singhairaj (1995)	B-9
B.8 Details of the mix proportions of SCC of Bui Khanh Van (1994)	B-10
B.9 Details of the mix proportions of SCC of Kim (1997)	B-11
B.10 Details of the Mix Proportions of Jin Choon Kim (1999)	B-12
C.1 Comparison of the compressive strength of conventional concrete between experiment and the model	C-2
C.2 Comparison of the compressive strength of roller-compacted concrete between experiment and the model	C-3
C.3 Comparison of the compressive strength of self-compacting concrete between experiment and the model	C-4
C.4 Comparison of the compressive strength of high air content concrete between experiment and the model	C-5
