

Acknowledgements

First of all, the author would like to express his sincere gratitude to his advisor, Assoc. Prof. Pruettha Nanakorn, for his invaluable guidance throughout the research. Specifically, the author would like to acknowledge Asst. Prof. Napat Harnpornchai and Asst. Prof. Krishna M. Neaupane for their astonishing comments and suggestions, and for their willingness to serve as the members of the thesis committee.

The author would also like to state his gratifying appreciation to Prof. Somchai Chucheeepsakul, Department of Civil Engineering, King Mongkut's University of Technology Thonburi, for his kindness to serve as the thesis external examiner.

In addition, thoughtful thanks are extended to the former secretary of Civil Engineering Program, Ms. Cholthicha Pradidkwan, and the secretary of Building Facilities Program, Ms. Chalida Yuenyaw, for their kind cooperation and services all the way through this study. This thank is also extended to Ms. Supattra Manachitrungrueng, the secretary of Civil Engineering Program.

Great helps and teamwork from Mr. Konlakarn Meesomklin, Ms. Chantima Somprasert and also Mr. Preecha Soparat are indeed important to the completion of this research.

Honest thanks are due to the author's friends for their help and encouragement. Finally, the most important thanks are to the author's family for their moral support, great understanding and also invaluable advices.
