

## Table of Contents

Chapter	Title	Page
	Signature Page	i
	Acknowledgement	ii
	Abstract	iii
	Table of Contents	iv
	List of Figures	vii
	List of Tables	x
	Nomenclature	xi
1.	Introduction	1
	1.1 Background and Statement of Problem	1
	1.2 Objectives of Study	2
	1.3 Scope of Study	3
	1.4 Methodology	3
	1.5 Organization of the study	3
2.	Literature Reviews	6
	2.1 Systems with Simple Configuration	6
	2.2 Systems with Transparent Insulation over Absorber	7
	2.3 Systems with Baffle Plate	11
	2.4 Systems with Reflector	14
	2.5 Comparative Study on Different Types of Systems	16
	2.6 System with Thermal Diode	22
	2.7 Concluding Remarks from the Reviews	22

3.	System Design and Modeling	24
	3.1 System Configuration	24
	3.2 Mathematical Model Formulation	26
	3.2.1 Absorber Plate	27
	3.2.2 Collector Channel	30
	3.2.3 Storage Tank	33
	3.2.4 Thermosyphon Flow Rate	34
	3.2.5 Thermal Performance Parameters	36
4.	Experimental Investigation	38
	4.1 Purpose of Experimental Investigation	38
	4.2 Configuration of Conventional Solar Water Heater	38
	4.3 Experimental Setup	39
	4.3.1 Measurement and Instrumentation	39
	4.3.2 Test Procedure	40
	4.4 Experimental Test Runs and Results	40
	4.5 Conclusion of Experimental Investigation	44
5.	System Simulation	45
	5.1 Introduction	45
	5.2 System Simulation Procedure	45
	5.3 System Simulation Parameters	48
	5.4 Determination of Overall Flow Coefficient, $K_f$	49
	5.4.1 Determination Procedure	49
	5.4.2 Determination Results	51
	5.5 Simulation Results and Discussion	53
6.	Conclusions and Recommendations	57
	6.1 Conclusions	57
	6.2 Recommendations for Further Investigations	58

References	60
Appendix A Experimental Test Runs	62
Appendix B Determination of $K_f$	66
Appendix C Simulation Results	67
Appendix D Construction Cost of BIS Solar Water Heater	69
Appendix E Source Code of Computer Program	70
Appendix F The Comments of the External Examiner and the Responses of the Author	86
