

LIST OF FIGURES

FIGURE	PAGE
3.1 The general view of the territories of coastal region	5
3.2 A two-dimensional schematic of sinusoidal wave propagating in x-direction	6
3.3 Definition sketch of boundary condition	7
4.1 Definition sketch of a breaking wave profile	14
4.2 Shelf beach idealization of the surf zone	16
4.3 The correlation between the measured Γ and the parameter h/\sqrt{LH} by using the laboratory data of Kajima et al. (1983)	21
4.4 The correlation between Γ and the parameter h/\sqrt{LH} included the present model with the local slope 0-1/20 by using the laboratory data of Kajima et al. (1983)	22
4.5 Comparison between measured and computed wave height of the present model by using the experimental data in Table 4.1	25
4.6 Example of wave height transformation compared with experimental data of Okayasu (1988) case 1-2, Shibayama and Horikawa (1986) case 2.1-2.2 and Kajima et al. (1983) case 3.1-3.2	26
5.1 Flow chart of the regular wave model	28
5.2 The input window and the topographical window of the computer program	29
5.3 The input window and the calculation results	30
5.4 The program menu window and graphical output of the computer program	30
A.1 Computed wave height transformation compared with laboratory data of Horikawa and Kuo (1966)	A-2
A.2 Computed wave height transformation compared with laboratory data of Kajima et al. (1983) and Kraus and Smith (1994)	A-3
A.3 Computed wave height transformation compared with laboratory data of Kraus and Smith (1994), Nadaoka et al. (1982) and Sato (1988)	A-4
A.4 Computed wave height transformation compared with laboratory data of Sato (1988-1989), Hansen and Svendsen (1984) and Shibayama and Horikawa (1986)	A-5
A.5 Computed wave height transformation compared with laboratory data of Shibayama and Horikawa (1986) and Smith and Kraus (1990)	A-6
A.6 Computed wave height transformation compared with laboratory data of Ting and Kirby (1994), Okayasu (1988), Horikawa and Kuo (1966) and Kajima et al. (1983)	A-7
C.1 The beach profile and wave height transformation of regular wave model case 1.2 by using the experimental condition from Kajima et al. (1983)	C-11

FIGURE	PAGE
C.2 The beach profile and wave height transformation of regular wave model case 2.2 by using the experimental condition from Kajima et al. (1983)	C-20
C.3 The beach profile and wave height transformation of regular wave model case 3.2 by using the experimental condition from Kajima et al. (1983)	C-28
C.4 The beach profile and wave height transformation of regular wave model case 4.3 by using the experimental condition from Kajima et al. (1983)	C-37
C.5 The beach profile and wave height transformation of regular wave model case 5.2 by using the experimental condition from Kajima et al. (1983)	C-46
C.6 The beach profile and wave height transformation of regular wave model case 6.1 by using the experimental condition from Kajima et al. (1983)	C-51
