

## Table of Contents

Chapter	Title	Page
	Signature Page	i
	Acknowledgement	ii
	Abstract	iii
	Table of Contents	iv
	List of Figures	vi
	List of Tables	viii
	Nomenclature	ix
1.	Introduction	1
2.	Background of a Diffusion Absorption Refrigeration Cycle	8
	2.1 System used as a domestic refrigerator	8
	2.2 Literatures concerning a diffusion absorption system	11
	2.2.1 Development of the boiler	11
	2.2.2 Alteration of auxiliary gas and inclusion of gas heat exchanger	12
	2.2.3 Improvement of the bubble pump	13
	2.3 Conclusion	14
3.	The Experimental Refrigerator	16
	3.1 Construction material	16
	3.2 The condenser	19
	3.3 The solution heat exchanger (SHX)	19
	3.4 The evaporator	19
	3.5 The absorber	20
	3.6 The bubble-pump system	22
	3.7 The rectifier	23
	3.8 Helium reservoir	23
	3.9 Thermal insulation	24
	3.10 Hermetic seal test	24
	3.11 Working fluids	24
	3.12 Instrumentation and control	25
	3.13 Conclusion	26
4.	An Experimental Study of Bubble Pumps	27
	4.1 The experimental set-up	27
	4.2 Experimental procedure	29
	4.3 Effect of tube diameter	30
	4.4 Effect of tube length	31
	4.5 Effect of head ratio	32
	4.6 The pump tube used in the experimental refrigerator	33
	4.7 Conclusion	34
5.	Mathematical Model	36
	5.1 Generator, Bubble pump, and Separator	38

<b>Chapter Title</b>	<b>Page</b>
5.2 Rectifier	40
5.3 Condenser	42
5.4 Evaporator and absorber	43
5.5 Combined evaporator-absorber effectiveness	44
5.6 Solution heat exchanger	46
5.7 Coefficient of Performance	46
5.8 Conclusion	47
6. Test Results and Discussion	48
6.1 Experimental procedure	48
6.2 Effect of the generator heat input on the system performance	49
6.3 Effect of helium charged pressure on the system performance	54
6.4 Effect of rectification temperature on the system performance	57
6.5 Conclusion	60
7. Recommendations for System Improvement	62
7.1 Increase evaporator and absorber mass transfer performance	63
7.2 Increase the solution heat exchanger effectiveness	64
7.3 Recover heat from the rectifier	65
7.4 Redesign of the bubble pump	66
7.5 Properly charge of the auxiliary gas	67
7.6 Conclusion	68
8. Conclusions	70
References	73
Appendix A Developments of the experimental set-up	75
Appendix B Calculation functions of selected thermodynamics properties of the ammonia-water system	86
Appendix C A Calculation Example of The Mathematical Model	89
Appendix D Test Results	93
Appendix E External Reviewer's Comments and Answers to the Comments	96
