

Acknowledgement

The completion of this thesis would mean nothing to me if I failed to acknowledge a number of people who have attributed a great deal of contribution as well as assistance for this research.

First of all, I would like to express my deep gratitude to my advisors, Assoc. Prof. Dr. Amorn Pimanmas. He has provided me a motivation, enthusiastic and valuable suggestions to complete my thesis in time. Without his full support, the applicable ideas would not have triggered my determination.

I greatly appreciate and would like to extend my profound thanks to Assoc. Prof. Dr. Pennueng Warnichai for allowing me to use equipment and perform entire experiment conveniently in the past three years and giving useful suggestions as well. I am also grateful to Prof. Dr. Somnuk Tangtermsirikul for serving as co-advisor. I am also grateful to Dr. Tamon Ueda, Professor, Chairman, Division of Built Environment at Hokkaido University, Laboratory of Engineering for Maintenance System, Japan for serving as external examiner.

Furthermore, I feel very thankful to colleagues for their help in conducting experiments - Mr. Preeda Chaimahawan, a doctoral student of SIIT, Mr. Jiraphong Tisavipat and Mr. Phuwanat Pornpongsaroj, senior master students of SIIT, Mr. Pramin Norachan, a senior master student of AIT. Especially, I also give special thanks to Ms. Krittiya Kaewmanee, a instructor of CE, SIIT, for grammar checking. Last but not least, every technician of AIT Laboratory including Mr. Nattapat Thong-u, a technician of SIIT, always help me to carry out all experiment session.

Love to my sweet little angel: Ms. Bupavech Phansri who is the best and most supportive friend of mine. She always encourages and empowers me to finish this thesis. I feel strongly appreciated to Phansri's family especially, Asst. Prof. Bupachart Phansri for their kind help to go ahead with my thesis.

Above of all, I am profoundly grateful to my beloved parents, Mr. Prasit Supaviriyakit and Mrs. Muihung Sae-tung, who always soothe me when I faced difficulties while studying. They provide me high strength, great determination, and essentially financial support throughout their life time. Therefore, I cannot definitely afford to skip to dedicate my success to them.
