

## LIST OF TABLES

TABLE		PAGE
4.1	Properties of concrete	43
4.2	Properties of reinforcing bar	43
4.3	Characteristic of measuring instrument	44
4.4	List of measuring gage for Debonded specimen (JB)	50
4.5	List of measuring gage for Diagonal specimen (JD)	52
4.6	List of measuring gage for Special joint transverse specimen (JT)	54
4.7	List of measuring gage for Plate specimen(JP)	56
4.8	List of measuring gage for Spiral specimen (JA)	57
5.1	The hysteresis behavior of each specimen in major drift ratio	81
6.1	The hysteresis behavior of specimen JB, JS, JM and JL in major drift	115
6.2	The hysteresis behavior of specimen JM, JB, JD and JP in major drift	126
6.3	The hysteresis behavior of specimen JM, JB, JR and JT in major drift	136
6.4	The hysteresis behavior of specimen JM, JT, JA and JP in major drift	144
7.1	Verification of beam-column joint model	178
A-1	Database of investigated buildings (Source: Chaimahawan and Pimanmas,2006)	A-2
A-2	Database of investigated buildings (Source:Cheejaroen,2004)	A-2
A-3	Structural indices of beam for buildings with large tributary area	A-3
A-4	Structural indices of column for buildings with large tributary area	A-3
A-5	Structural indices of joint for buildings with large tributary area	A-3
A-6	Structural indices of beam for buildings with medium tributary area	A-4
A-7	Structural indices of column for buildings with medium tributary area	A-4
A-8	Structural indices of joint for buildings with medium tributary area	A-4
A-9	Structural indices of beam for buildings with small tributary area	A-5
A-10	Structural indices of column for buildings with small tributary area	A-5
A-11	Structural indices of joint for buildings with small tributary area	A-5
