

## List of Tables

Table		Page
4.1	Table showing the performance of the cascade on the holdout set for each time new stage is added.	22
4.2	Summary of the experimental parameters.	24
5.1	Summary of the result from the testing of complete hand detector system on the test set containing 99 images.	26
5.2	False positives after each important modules of the detector system. This table covers only six consecutive frames (shown in Figure 5.2) from test set and gives the idea of how each stage of the system reduce false positives on each image.	28
